

How Earthquake Engineering makes our cities and infrastructure safer?

Natural disasters around the globe are occurring at an alarming rate. Earthquakes in particular have caused severe damage in infrastructure, impact economy, displace communities, and caused loss of many lives. Structural engineers, geologists, earthquake engineers and other professionals help to make our cities and infrastructure safer against natural hazards.

To provide a venue for both professionals and the public to understand and discuss resilient built environment, the Asian Institute of Technology (AIT), Engineering Institute of Thailand (EIT) and Association of Structural Engineers of the Philippines Inc. (ASEP) cordially invite everyone to attend the **Open Public Session** at the **7th Asia Conference on Earthquake Engineering (7ACEE2018)** on 22 November 2018, 9:00 am – 12:00 noon and 24 November, 1:00 – 2:30 pm at the Sheraton Grande Sukhumvit, Bangkok, Thailand.

The Keynote speakers in these sessions include Mr. Ashraf Habibullah, CEO and President of Computers and Structures, Inc (USA); Prof. Fumio Yamazaki, Professor Chiba University, Japan; Dr. Sheng Bao-Tseng, Chairman, Sinotech Engineering Consultants, Inc. Taiwan; Prof. Peter Fajfar, Professor, University of Ljubljana, Slovenia; and Prof. Pennung Warnitchai, Professor, AIT. The speakers will share latest developments in earthquake engineering and the key role of structural engineering and earthquake engineers in future proofing our built environment.

22 November 2018 | Thursday

Morning Open Public Session Program

09.00 - 09.15	Opening Ceremony Introduction and Welcome Remarks by Dr. Eden Y. Woon, AIT President
09.15 - 10.00	New Monitoring and Sensing Technologies of Earthquake Engineering in Japan Prof. Fumio Yamazaki
10.00 - 10.30	Coffee Break and Networking
10.30 - 11.15	Structural and Earthquake Engineering - Indispensable to Humanity Mr. Ashraf Habibullah
11.15 - 12.00	Moving Towards Smart City - Challenges and Solutions for Disaster Prevention and Mitigation Dr. Sheng Bao - Tseng

24 November 2018 | Saturday

Afternoon Open Public Session Program

13.00 - 13.45	Trends of Seismic Analysis in Europe Prof. Peter Fajfar
13.45 - 14.30	Keynote by Prof. Pennung Warnitchai
